87daysofsam@gmail.com

Education

Diablo Valley College
May 2016 - July 2016, California

Projects

- ➢ **Jo-Jo.club** - This is a website I built with React for a customer in Taiwan, according to their specifications.
- ➢ **Stake.Zombie.Finance** - This is a Dapp built with React, Typescript and Ethereum. Stake.Zombie.Finance is a social experiment with the logic of (FOMO) it has an ever shifting price from day to day due to its Rebase and Debase of supply. In order to view the site's full features you must use an Ethereum compatible wallet such as Metamask.
- ➢ **Shrimp.Finance** - This is a Dapp built with React, Typescript and Ethereum. Shrimp.Finance is a user portal for supplying liquidity and being rewarded with our Erc-20.In order to view the site's full features you must use an Ethereum compatible wallet such as Metamask.
- ➢ **Terminowl.com** - The current home of my favorite projects I have completed, and more information about me.

Courses

freeCodeCamp - **fullstack developer curriculum**

Kyle Simpsons - You Don't Know JS Series

Colt Steele - The Advanced Web Developer Bootcamp

Skills

HTML **|** JavaScript **|** CSS **|** BootStrap **|** jQuery **|** React **|** Angular **|** Egret **|** Ethereum **|** CSS Grids **|** CSS Flexbox

Experience

Progressing Today / Frontend Developer
Feb 2020 - PRESENT Taipei Taiwan Xinyi District

I work currently as the Frontend developer. During my time here I have built 3 games with Egret, 1 community site with React, and 3 Dapps with Angular, React, Typescript and Ethereum.

McCabe Fine Builders/ Project Leader
May 2018 - Feb 2020, San Francisco Bay Area

I worked as a site supervisor and was integral to scheduling, and finishing projects.

Swift Construction / Project Leader

December 2013 - April 2018, San Francisco Bay Area

Most of my work required identifying problems and troubleshooting them for the most efficient repair, as well as communicating as a part of a team.
